*Cisplatin dosed at 100 mg/m^2 every three weeks OR dosed at 40 mg/m^2 weekly over the course of radiotherapy. There are several different appropriate cisplatin schedules that may be used.

† Administered at a dose of 200 mg every 3 weeks OR 400 mg every 6 weeks per the FDA label

‡ Substitution of carboplatin for cisplatin, and vice-versa, is acceptable for metastatic disease

Note: Pathways are independent of specific health plan medical policy coverage criteria. Health plan medical policy/clinical guidelines should be consulted to determine whether proposed services will be covered. Biosimilars of reference products listed are considered "on pathway." However, reimbursement for biosimilar products may be impacted by health plan specific formularies, medical policy and preferred product rules.
